

# IS Essentials Rating Tool Launch Event

16 July 2024

# Acknowledgement of country

ISC would like to begin by acknowledging the Traditional Custodians of the lands on which we meet today.

We acknowledge their deep connection to land, water and culture, and pay our respects to their Elders past, present and emerging.

Tēnā koutou katoa to our attendees in New Zealand.

# Agenda

1

**IS Essentials Tool – Our Newest Rating Tool**  
Patrick Hastings, Chief Executive Officer

2

**IS Essentials Tool in Action**  
Andrew Aitken, Program Sustainability Principal, Inland Rail

3

**Tool Development Process & Rating Tool Overview**  
Tyrel Momberg, Technical Manager

4

**Ratings Digitalisation**  
Rob de Carvalho, Head of Technology

5

**IS Essentials Training**  
Hayley Grieves, Head of Learning & Capability

6

**Getting Started & Question & Answer**

Essentials

Westpac NZ Government  
**INNOVATION  
FUND**

# IS Essentials Tool – Our Newest Rating Tool

Patrick Hastings, Acting Chief Executive Officer, Infrastructure Sustainability Council

# IS Essentials

The newest tool in the IS Ratings Scheme

**Design & As-Built Rating Tool for Projects \$5m – \$100m**

**ISC's first digital rating**

**Program Approach**

**Developed to support all assets to maximise the social, environmental and economic return from assets**

**Supported by the Westpac New Zealand Government Innovation Fund**

# The Value Proposition

- ✓ **Enable and support organisations to deliver broader benefit from assets**
- ✓ **Support a project and organisation to accelerate your sustainability objectives**
- ✓ **Measure the assets' sustainability performance**
- ✓ **Enable organisations to better manage social licence through third party assurance on performance**
- ✓ **Avoid threats such as greenwashing and improve reputation**
- ✓ **Support organisations to future proof assets**

# IS Essentials

- ✓ **Enable ratings for smaller projects**
- ✓ **Reach sectors / organisations with smaller average project size (water, energy, local government)**
- ✓ **Digital platform for improved assessments management**
- ✓ **Resource Hub for enhanced access to guidance and templates**
- ✓ **Possible entry level tool for organisations new to IS Ratings**

# Pilot Projects, Technical Working Group Members and Industry Reference Group

## Pilot Projects

## Technical Working Group Members

## Industry Reference Group

# IS Essentials Pilot Projects

IS Essentials has been tested across a large variety of asset types, locations (Australia & New Zealand) and project sizes (Capex Range: \$8m- \$100m)

## Port

- Channel Beacon Replacement
- Dock Upgrade

## Energy

- Energy Substation
- Water to Energy Plant

## Water

- Water Plant Upgrades

## Social

- Board Walk
- Public Swimming Pool

## Rail

- Corridor Repair Works

## Road

- Pedestrian & Cyclist Bridge
- Road Realignment Upgrades
- Roundabout

## Airport

- Aviation precinct and terminal expansion

# IS Essentials Tool In Action

Andrew Aitken, Principal Sustainability Advisor, Inland Rail

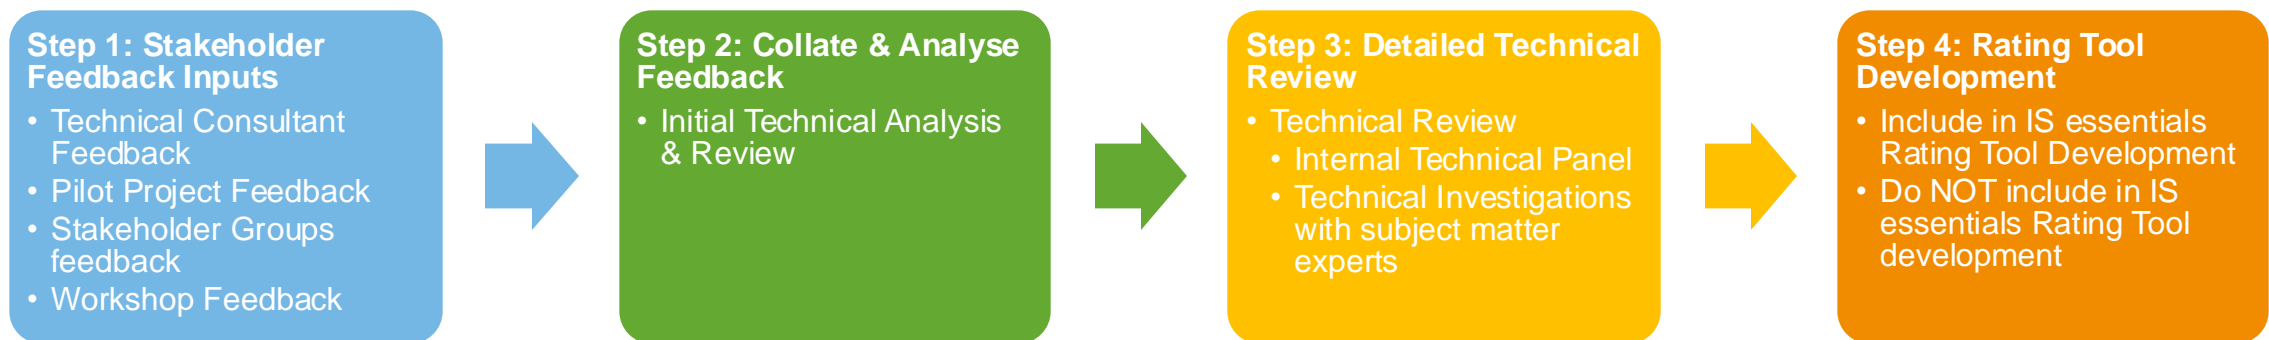

# Tool Development Process & Rating Tool Overview

Tyrel Momberg, Technical Manager, Infrastructure Sustainability Council

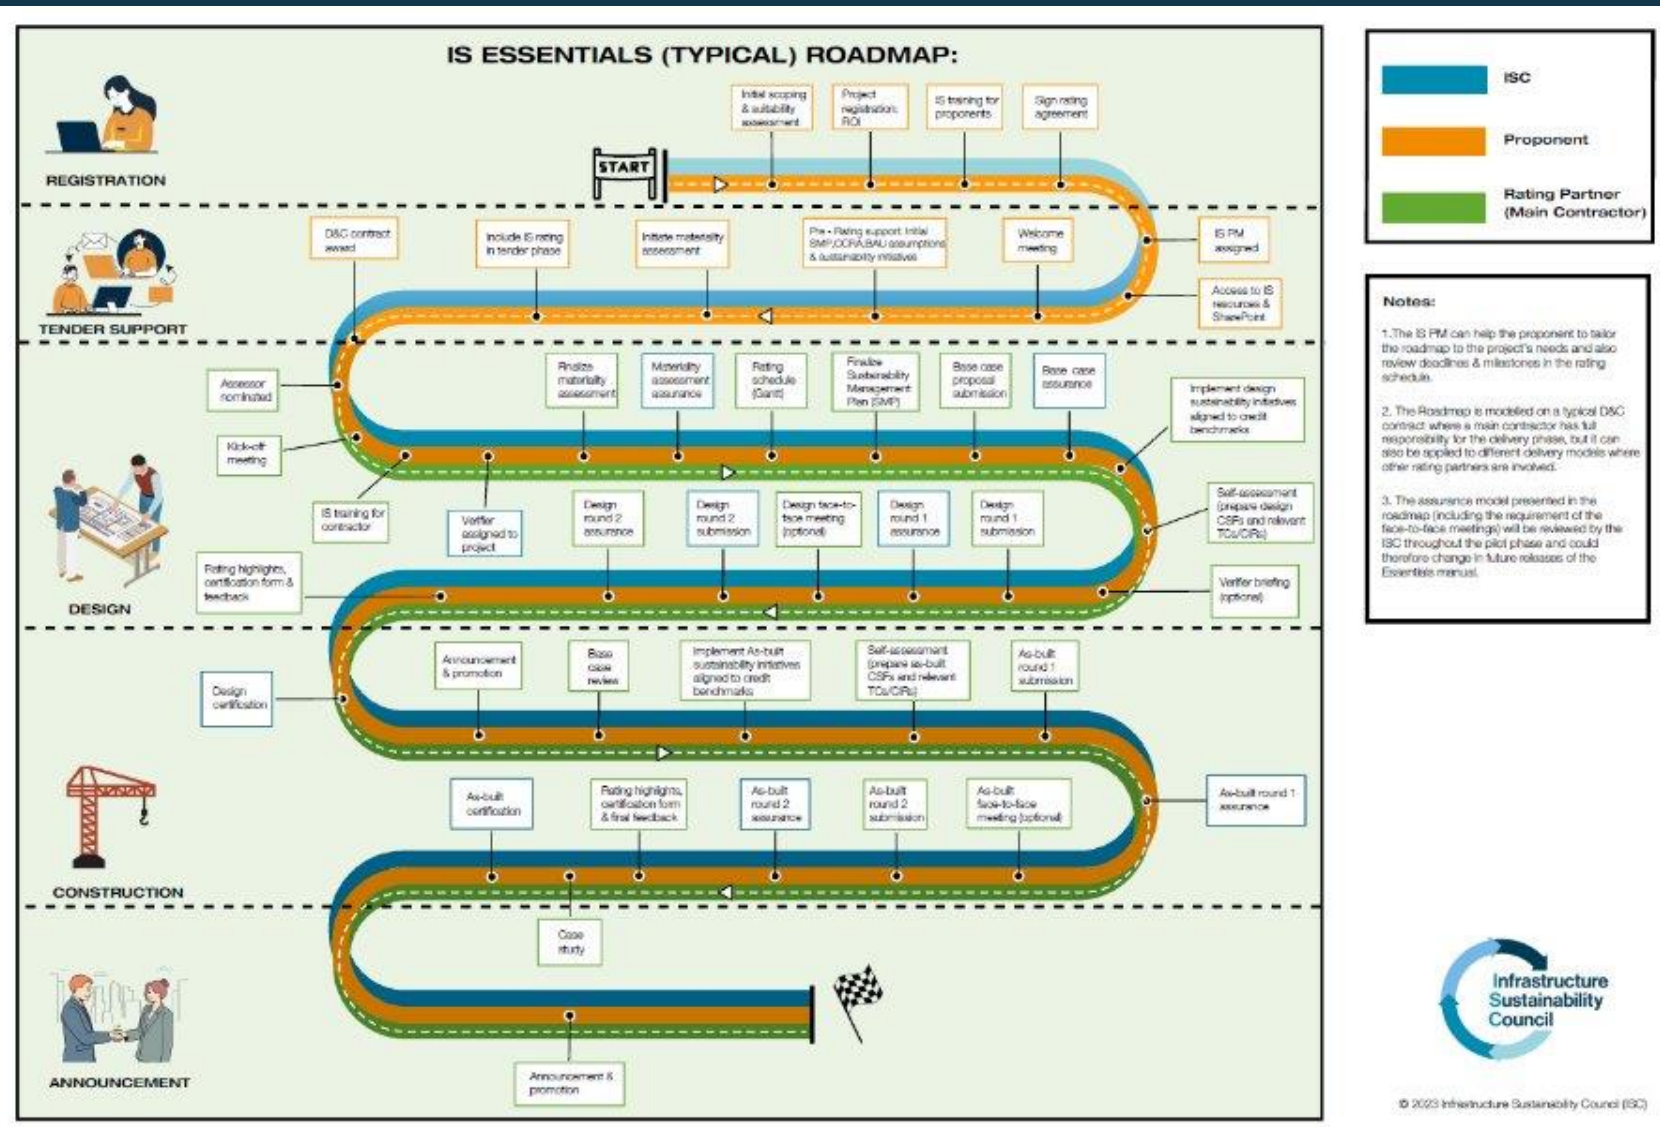

# Technical Tool Development Process

## Iterative Process

# Roadmap

IS Essentials is designed to reduce the complexity of IS ratings for projects \$5-100m.

## Tool Developments that enable 'scalability'

- ✓ Materiality Assessment
- ✓ Base Case
- ✓ Capex Bands
- ✓ Program approach
- ✓ Templates/Examples
- ✓ Verification

# Item 1: Materiality Assessment

(automated process)

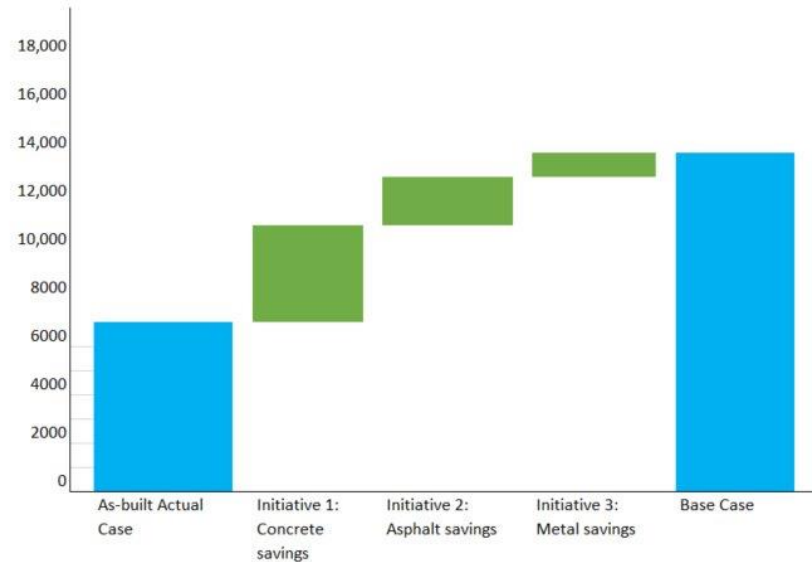

Capital Band	'Permanent' Credits Screened in	'Additional' Credits Screened in	Total Credits Screened in		'Elective' Credits Screened in
			Lower Limit	Upper Limit	
\$5 to <20 M	10	0 - 5	10	15	voluntary
\$20 to <50 M	10	5 - 10	15	20	voluntary
\$50 to 100 M	10	10 - 15	20	25	voluntary

Possible scenario:

# Item 2: IS Essentials Base Case Approach

## Base Case option – as per larger project tool

- Demonstrates reductions beyond industry business as usual

## Lite credit option – for <\$50M and low experience projects

*Applicable to these credits only*

- Monitor and model resource consumption for construction and operation phases.
- Identify and implement suitable reduction opportunities

# Item 3: Capex Bands – ‘credits’ & ‘criterion’

## Impact of Capital Bands

### 1. Credit Applicability

- **Wfs-1 Jobs, skills and Workforce Planning**
  - \$5 to <20 M - credit not applicable and scoped out in the materiality assessment
  - \$20 - to 50M - only the As Built Criteria apply
  - \$50 to 100M - both Design and As-Built Criteria apply

### 2. Credit Criteria Applicability

- **Wfs - 2 Workplace Culture and Wellbeing**
  - \$5 to <20M - only the As Built criteria apply
  - \$20 to <50M - only the As built criteria apply
  - \$50 to 100M both the Design & As Built criteria apply

### 3. Credit Criterion Applicability

- **Sta - 2 Stakeholder Engagement Implementation**
  - \$5 to <20M - this criterion is not applicable
  - \$20 to <50M - this criterion is applicable
  - \$50 to 100M - this criterion is applicable

### 4. Must Statement Applicability

- **WFS – 3 Diversity and Inclusion**
  - \$5 to <20M – the must statement is not applicable
  - \$20 to <50M – the must statement is applicable
  - \$50 to 100M - the must statement is applicable

# Item 4: Program & Organisation Approaches

## Program Rating Approach

- The purpose of an IS Program Rating is to maximise sustainability outcomes and impact across multiple projects through shared opportunities and efficiencies

## Organisational Inputs

- The ISC recognises that work undertaken at the ‘Organisational level’ may be used to meet multiple credit criteria (or parts thereof) within IS Essentials projects

# Item 5: Templates

**Infrastructure Sustainability Council** IS Resource Outputs Reporting Template - Summary

### Final scores [% Volume]

Category	Design score	Design level achieved (default targets)	As Built score	As Built level achieved (default targets)
On-site reuse - Clean / inert excavation spoil (C&D)	100%		100%	
Clean / inert excavation spoil (C&D)	100%	Level 3	100%	Level 3
Office resources	19%	Below level 2	19%	Below level 2
Other inert and non-hazardous resources (C&D)	17%	Below level 2	17%	Below level 2

**Infrastructure Sustainability Council** IS Essentials Ecological Value Reporting Template

IS Essentials Ecological Value Reporting Template  
Design Phase

**Project Details**  
 Project Number: *Please enter project number here*  
 Project Name: *Please enter project name here*

### Ecological Value Reporting Template Instructions

**Definitions:**  
 For definitions of Ecological Features, Ecological Values and Offsets, refer to the IS Essentials Design and As Built Technical Manual.  
 The 'Ecological Significance' applied to an ecological feature is used to determine its value or importance relative to other Ecological Features. The ecological significances applied may be determined by regulatory process\* or stipulated by an SGP as per Eco-1 UL1.4 (refer to the SGP requirements within Eco-1).  
 The Ecological Significance factors applied need to be consistent with each other (i.e. based on the same scale/metric).  
 The 'Condition' score is used to account for varying conditions of Ecological Features and can range between 0 (low or poor condition) and 1 (good condition). Depending on the assessment method applied, this may already be considered in the calculations for Ecological Significance and/or not relevant. If this is the case, apply a condition score of 1 for all features and offsets.  
 \* Relevant regulatory processes may include the Habitat Hectare Assessment (VIC), BioCondition Assessment (QLD), Biodiversity Assessment Method (NSW).

**Process:**  
 Step 1 - Determine the total Ecological Value of the Ecological Features being cleared onsite.  
 Step 2 - Determine the total Ecological Value of mitigation measures and project-led enhancement measures.

### Step 1 - Loss of Ecological Value from Clearing of Ecological Features

Ecological Feature	Post-development			
	Ecological Significance	Extent (ha)	Condition (0-1)	Loss in Ecological Value
Gum trees	2	0		-20
				0
				0
				0
				0
				0
				0
				0
<b>Total Clearing</b>		<b>0.000</b>		<b>-20,000</b>

### Step 2 - Gain in Ecological Value from Mitigations and Project-Led Enhancements

Mitigation/Enhancement Measures	Post-development			
	Ecological Significance	Extent (ha)	Condition (0-1)	Gain in Ecological Value
corridor trees elsewhere on site	1	40	1	40
				0

# Item 6: Verification Process

- One verifier (two rounds of verification)
- Materiality Assessment ISC agreed

# Fees

Australia

New Zealand

Planning v2.1

## Ratings > RDC15 - Dodgeball Stadium

Saved at: 5:21 pm

[Summary](#) [Materiality Assessment](#) [Base Case Proposal](#) [Design](#) [As Built](#) [Document library](#)

The Materiality Assessment requires projects to identify 'material' or priority sustainability aspects in relation to project context. Prior engagement with key stakeholders including the community will assist projects to answer stakeholder-related materiality questions and have these responses verified. The requirements for completing the Materiality Assessment, including internal and external stakeholder involvement, are outlined in the IS Essentials (Design & As Built) Technical Manual. The completed Materiality Assessment needs to be verified. The IS Project Manager will manage the verification process with you.

Materiality does not change across the following categories: Leadership & Management, Sustainable Procurement, Innovation, Legacy and Workforce Sustainability.

For all other credits, questions related to project impacts and importance to stakeholders are used to generate a project-specific materiality score (from 0 to 4). Projects may propose an alternative materiality score (other than that generated via the assessment questions) with justification. Credits with a materiality score of 0 may be scoped out. All materiality scores require justification and supporting evidence. A list of suggested evidence is provided in the Materiality Assessment tab - these are suggestions only and you should consider what is most appropriate for your project's context.

Materiality Assessment Status: **Prepare**

## Ratings > RDC15 - Dodgeball Stadium

Saved at: 5:42 pm

[Summary](#) [Materiality Assessment](#) [Base Case Proposal](#) [Design](#) [As Built](#) [Document library](#)

The IS Essentials (Design) rating is an interim verification step, following the completion of project design. Once the IS Essentials (As Built) component of the rating has been verified, the IS Essentials (Design) rating score is replaced with the final IS Essentials (Design & As Built) rating score. Refer to the **Technical Manual** for more information.

The **Overview** tab lists the credits included in the current rating, based on the results of the Materiality Assessment.

- You may modify your *Estimated submission date* prior to submitting for Round 1 verification. Please keep this date as accurate as possible and inform your ISC Project Manager as soon as you become aware that the date may change.
- The icon next to each credit indicates if you have completed the work required for that credit, including responding to verification feedback if you are in Round 2. A green tick indicates complete, an orange bar indicates incomplete.
- Prior to submitting for verification, you may change the *Target level* for each credit. This will adjust the *Targeted points* and alter the form for the credit shown in the *Credits* tab. Level 0 indicated you will not be attempting the credit.

The **Credits** tab is where self-assessment and verification is completed for each credit.

- The list on the left is the list of credits included in this rating. Clicking on a credit will update the main pane with the details of the credit.
- For each credit, a list of criteria within the targeted level appears at the bottom of the screen. Expand each criteria to see a list of requirements (must statements) from the **Technical Manual**.
- For each criteria, a *Self-assessment Complete?* dropdown is provided for you to track your progress. All criteria must be either *Complete* or *Not attempted* prior to submitting for verification.
  - Incomplete - criteria has work still to be completed. You may enter draft responses and update them at any time prior to submitting for verification.
  - Complete - all work on the criteria is complete and it is ready to be verified.
  - Not attempted - this criteria will not be attempted. Only applies where the credit does not require all criteria to be attempted.
- For each requirement (must statement), you may make notes for yourself or your team using the comments icon. These notes are for your use only and do not form part of the submission (although ISC staff will be able to see them). An empty icon indicates there are no notes, a filled in icon indicates there are notes.
- During verification, feedback will be added under *Verification feedback*.

When you have completed all credits you are attempting, use the *Submit for verification* to submit your self-assessment. During verification you will not be able to make changes to your submission. In Round 2, your ISC Project Manager will update the *Status* to "Round 2 Prepare" to allow you to update your self-assessment and respond to verification feedback.

# Existing ISAPs

Free access until 31st July 2024

- All existing ISAPs
- Free enrolment
- Register via website
- Access for up to 6 weeks

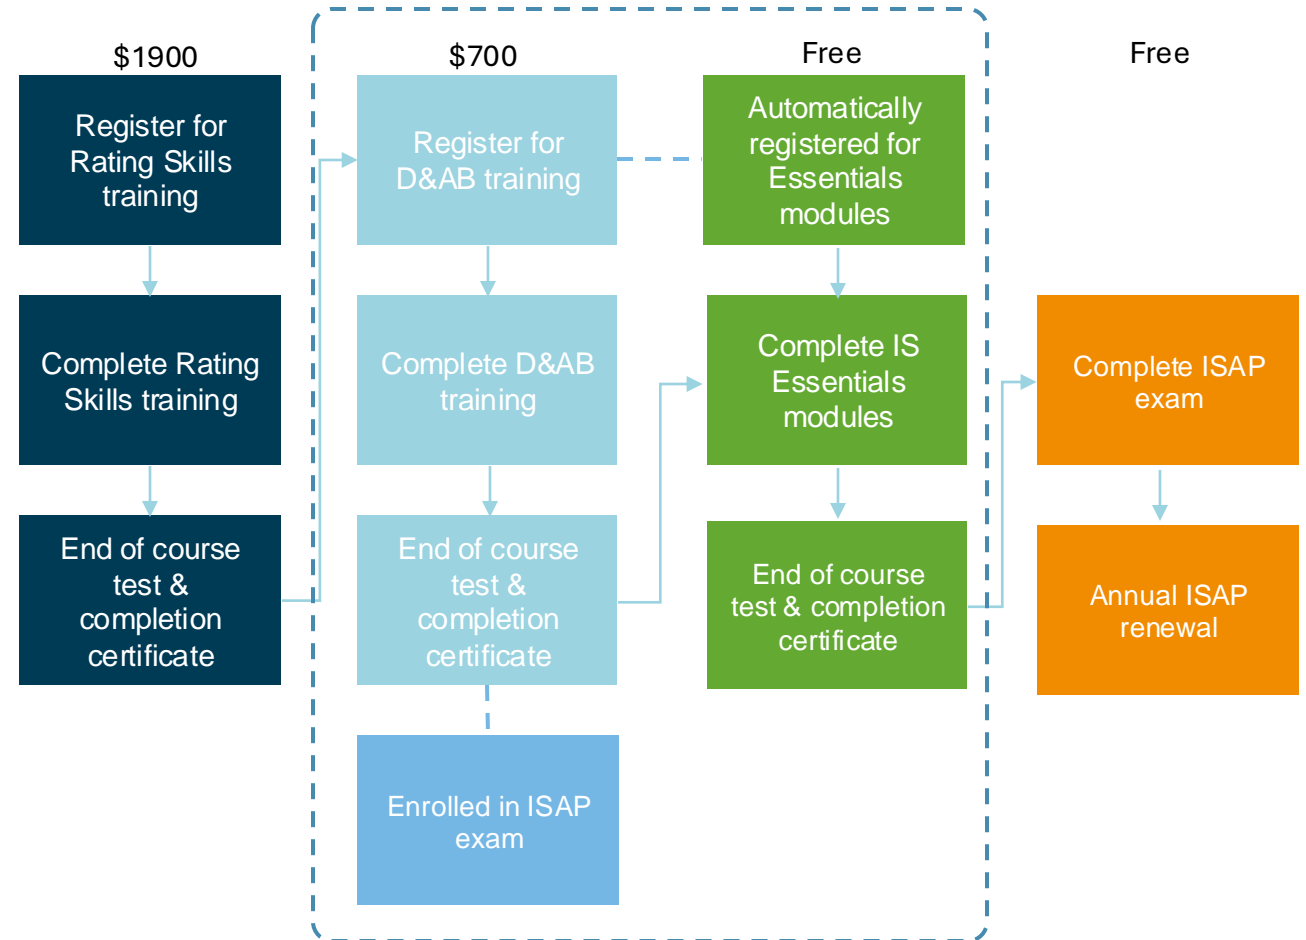

# New ISAP

From August 2024

- New to the IS Rating Scheme
- Trained in Planning or Operations
- Members: \$2,600 +GST, Non-members: \$3,675 +GST
- Essentials is free as part of pathway
- Register via website
- Access for up to 6 weeks from D&AB course completion

# Register for IS Essentials

<https://www.iscouncil.org/our-offerings/51-is-essentials/region-AU/>

The screenshot shows the Infrastructure Sustainability Council website. The navigation bar includes links for IS Ratings, Membership, ISupply, Learning, Events, Advocacy, Insights & Media, and an ISAP Login button. The main content area features a 'Learning and Development' banner with the text 'Already a learner? Log in to My IS Learn'. Below this, there is a list of learning programs: ISAP Renewal, IS for Professionals Pathways, RISE Mentoring Program, and Women in Sustainable Construction. A section titled 'Our Courses' includes filters for 'All', 'IS for Professionals', 'Leadership & Culture', 'Supply Chain', and 'Webinars'. Three course cards are displayed: 'Inland Rail Business Sustainability Toolkit', 'IS Essentials', and 'ISAP Renewal Exam FY25 - IS v1.2 D&AB'. Each card includes a brief description and an 'Explore Now' link.

Use promo code **ISAPEssentials** for free registration until 31<sup>st</sup> July 2024

## Payment details

Promotional code	<input type="text" value="ISAPEssentials"/>	<i>Includes</i> IS Essentials Free (-210.00)
Purchase order	<input type="text"/>	Subtotal 0.00 Excludes GST (10%) 0.00
Voucher code	<input type="text"/> <input type="button" value="Apply"/>	<b>Amount due (AUD) 0.00</b>
Payment method	<input type="text" value="Credit card (online)"/>	
Payment by credit card allows you to secure your registration(s) immediately. After you confirm your order you will be taken to a secure page where you can pay online.		

## Terms and conditions

16 July 2024

# IS Essentials registrations are now open

- 1 Register for a Rating
- 2 Upskill by enrolling in Training
- 3 Visit our website, FAQ's, read our brochures and case studies
- 4 Visit our Resource Centre

|| **Thank You**
